

Business Energies Solar PPA

Energy Generation helping you to manage your rooftop in the most profitable way

Utilise your roof space and save on your electricity costs with a solar power purchase agreement

A solar power purchase agreement (PPA) from Business Energies allows you to reduce your carbon emissions and your electricity bill by going 'off grid' for a proportion, or potentially all, of your electricity consumption during the day.

Business Energies & Partners will install, own and operate the solar photovoltaic system. We utilise only proven technologies with long operational track records that require minimal ongoing maintenance and limited business interruption at your sites.

Long-term cost savings and zero-carbon emissions from a 100% renewable PPA

How it works

A solar photovoltaic system is installed on your premises. We pay to install, own, maintain and run it. You have no upfront and maintenance costs.

During the day, the solar installation generates power that is first consumed by you. Any excess can be exported to the grid.

Power generated is 100% renewable and zero-carbon. Pricing is via a long-term PPA.

At the end of the agreement, you can either buy the panels at a pre-agreed price or will remove the installation from your premises.

The benefits for your business

Security of renewable, zero-carbon electricity

No upfront capital costs

Day one savings

Fixed power price with long-term PPA

Protection against rising prices

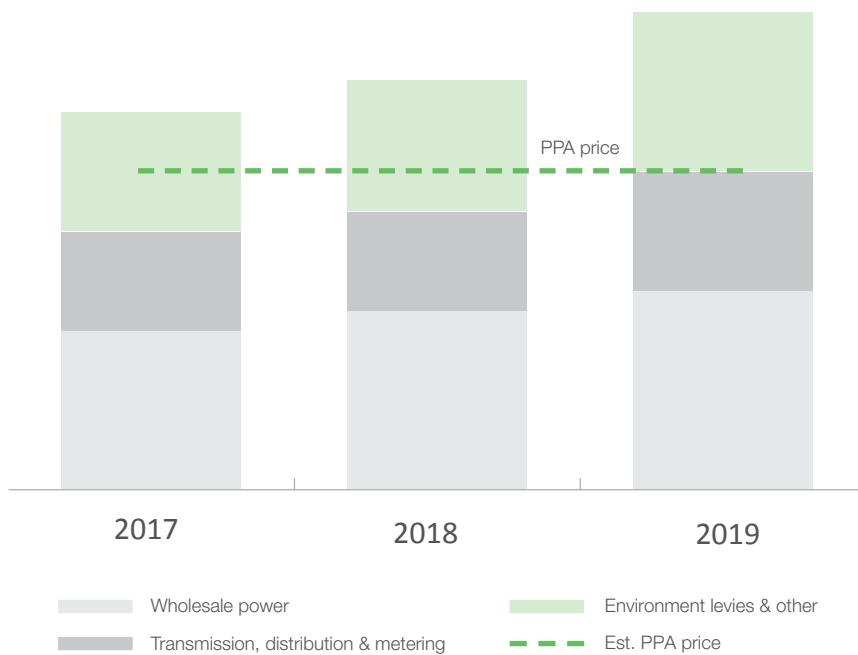

Save on network and environmental levies

No technology or maintenance risk for customer

Proven technology from trusted suppliers

Quick installation with minimal customer disruption

Currently, UK companies with a focus on eco-innovation are growing at an annual rate of 15% at a time when many competitors remain flat. Many of these companies are SME/medium-sized and co-operate enterprises making up an astounding percentage of the UK's economy.

When you consider the benefits of eco-innovation from a business perspective, it's not hard to see why these companies are growing.

Sustainable companies are:

- Tapping into new and emerging markets
- Attracting investors
- Getting ahead of regulations
- Increasing profitability
- Promoting innovation in house auditing ESOS compliance
- Improving their buildings Energy Performance rating

Eco-innovation is not easy, but it is certainly exciting. It is essential for all of today's businesses to realise that going green is not a stunt: it is a sound business strategy with a positive impact on the bottom line.

We're now working with some of the UK's largest corporates and local authorities to deliver on-site PPA solar.

The first step towards improved energy efficiency go solar

Next steps

1

Provide us with your approximate energy consumption and the locations of your sites

2

We'll model your site and tailor a proposal to your needs

3

Discuss and agree terms of the power purchase agreement

Get in touch

Our solar PPAs are part of a range of energy solutions we offer to help improve your energy efficiency, reduce your carbon emissions and manage your energy costs.
